

REGISTREE

The Problem

Student data is costly to verify, easy to fake, difficult to share

Verification

Self-reported data needs to be verified, which is costly

Third-party access

Difficult for universities to manage third party access to verified academic data

Longevity

Institutions can fail - no legacy system for credentials yet

This creates a fragmented ecosystem

No integration between services which use student data and student data itself

Degree verification

Time consuming

Difficult to do bulk verification

Cross institution verification

leap.ly

Recruitment platforms

No verification of degrees

Storage of personal data

Limited candidates

BCDiploma

Degrees on the blockchain

No searchability

No ownership

No longitudinal records

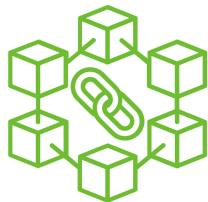

Our goal

Using the blockchain to create a student data ecosystem without the collection of data

The Registree solution

Helping you make your verifiable information discoverable

Leverage blockchain

to create a secure interface and storage mechanism for student data

Partner with universities

to host our system and receive a share of our revenue.

Making academic information searchable

to third parties but delegate the choice to reveal personal information to the student

Our key features

Integrity

Using the blockchain and a SSI solution we **guarantee data integrity**

Searchability

We **reduce the time and cost** of verifying student data

Relative marks

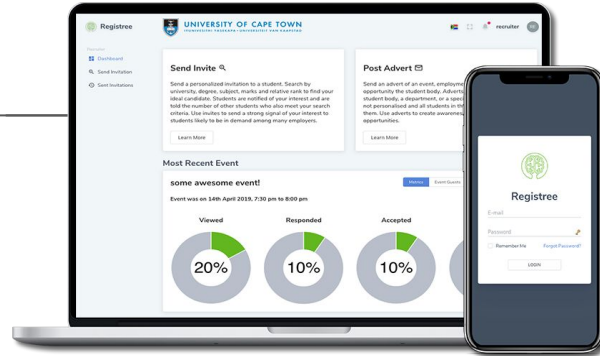

We are able to offer insights as to a **student's performance relative to their peers**

Privacy preserving

We **never touch the underlying data** and sharing is always left up to the data owner

The Registree recruitment platform

We help students find jobs by reducing search costs

Students are contacted and **can choose whom to share** their transcripts with

Employers can **search, filter and connect** with their ideal candidates

Other features

Credential verification

Updates when new marks are added

Our services

We monetize the ability to search, filter and receive verified academic information

Transcript verification

Free

Students can verify degrees free of charge

Third party search

Pay per search

Price increases with scope of the query

Third party subscription

Pay for a year of updates

Price increases with frequency of updates

Other Revenue Opportunities

Credit Scoring

Analytics

API

Micro-certificates

Full integration with the University of Cape Town

Joint pilot where we have onboarded all final year commerce students

3 - Specify students criteria to contact

Select the students you want to contact.
