# Blockchain Executive Training

Blockchain technology is rapidly gaining traction, but the majority of senior executives (63%) still don't know what it is, according to a Global Blockchain Business Council survey reported in Cointelegraph.

The global blockchain market is expected to increase by 80% between 2018 and 2023, from \$1.2 billion to \$23.3 billion, according to ReportLinker.

The most significant advantage of blockchains distributed ledger is reduced operational cost and streamlined efficiency which provides transparency, reliability and authenticity.

Blockchain technology is undoubtedly here to stay and will change the face of business as we know it in the next few years.

**This course has a theoretical basis, but also includes discussions, tutorials and practical's to ensure each participant attains an adequate knowledge base to make high-level decisions with regards to blockchain in their organisations.**

**REQUIREMENTS**  
No prior knowledge of blockchain technology and cryptocurrencies is required

**DURATION**  
Over 3 days  
2, 3 & 4 June 2020  
(09h00 - 11h30 SAST)

**TRAINING METHODOLOGY**  
Online via  
GoToWebinar

**PRICE**  
R1,500 per person  
(including vat)

## TRAINING OUTCOME:

The outcome of this training is to provide attendees with a general overview of cryptocurrencies and blockchain technology.

The course provides a good foundational knowledge of how cryptocurrencies and blockchain technology work, what they can be used for and why they are viewed as being so innovative and disruptive.

The training provides an overview of some important use-cases for blockchain technology in the public sector.

The session will help attendees understand the importance of this technology in terms of building and using permissionless technology.

It will provide attendees with an insight into the future of this technology in terms of innovation and disruption of existing traditional systems and processes as well as how attendees can leverage the benefits of this technology in their own field of work.

This course has a theoretical basis, but also includes discussions, tutorials and practical's to ensure each attendee attains an adequate knowledge base to make high-level decisions with regards to blockchain in their organisations.

This is not a comprehensive training session and attendees are encouraged to contact the Blockchain Academy for further consulting and training to expand on this knowledge.
